

Engage
Decide
Learn

I appreciate that REVAS allows the students to make poor decisions and see the consequences. Other programs have fewer opportunities for students to spend themselves into debt, which I feel really created a great teachable moment. Since it starts with the restaurant not being open, I find that it is particularly effective of capturing the full entrepreneurial experience. Students were very impressed at the depth of the decision options, and enjoyed getting to handle a full scope of the HR process (job post, resume review, job offer, training, appraisal, etc.)
